HAIR TREATMENT LINE

WE CHANGE. IT'S NATURAL.

A conceptual image illustrating climate change. A single tree stands on a grassy hill. The foreground is a cracked, dry, brownish ground, contrasting with the green grass on the right. The sky is split: dark, stormy clouds on the left and a clear blue sky on the right. The text "CLIMATE CHANGE" is overlaid in the center.

CONSCIOUS BEAUTY

OUR INSPIRATION

I think, therefore I am. And, what's more, I think, therefore I choose.

Now, aspiring to personal wellness goes hand in hand with care for the environment which, in turn, needs looking after.

The search for holistic beauty and knowing that all our gestures leave a footprint call us to walk down the sustainability path with determination.

In keeping with this consumer-inspiring ingredient, we have rethought and reformulated the Morphosis Hair Treatment line to offer you products that are increasingly more innovative and sustainable.

Perfect for answering all your Conscious Beauty needs.

有意識的美

我們的靈感

我思故我在。而且，更重要的是，我思考，所以我選擇。

現在，追求個人健康與愛護環境息息相關，而環境也需要照料。尋求整體美感並知道我們所有的姿態都會留下足跡，這要求我們堅定地走上可持續發展的道路。

為了與這種激發消費者靈感的成分保持一致，我們重新考慮並重新制定了 Morphosis Hair Treatment 系列，為您提供越來越創新和可持續的產品。

完美滿足您所有有意識的美麗需求。

MORPHOSIS
HAIR TREATMENT LINE

OUR VALUES

Still the symbol of science meeting nature, now **MORPHOSIS** gives hair the greatest **FUNCTIONAL** and **COSMETIC RESULTS WITH REDUCED ENVIRONMENTAL IMPACT.**

- Locally-sourced ingredients
- A technology that preserves the bio-availability of key ingredients
- Recyclable packaging and communication materials from sustainable certified processes

Our choices for a Salon that is in tune with a changing world are not a trend, but shared values.

Because we change. It's natural.

我們的價值

仍然是科學與自然相遇的象徵，現在 MORPHOSIS 給頭髮帶來最大的功能和美容效果，減少對環境造成的影響。

就地取材

一種保留關鍵成分的生物利用技術

來自可持續認證流程的可回收包裝和通訊材料

我們為沙龍選擇的是與不斷變化的世界保持一致的趨勢，共同的價值觀。
因為我們變了。這是天然的。

SCALP

Caring for the scalp

THE NEED, THE ANSWER

The scalp is highly sensitive to a person's general health.

Excessive sebum, dryness or sensitivity can come from stress, a poor diet or a temporary imbalance with symptoms such as redness, dehydration and rash.

Even healthy scalps can build up fatty residues, pollutants, styling products or dead cells that need to be periodically removed to oxygenize the follicles.

That's why a scalp ritual should be part of a wellness routine, providing a pleasant feeling of freshness and lightness that will sooth even the most delicate skins.

需求，答案
頭皮對一個人的整體健康高度敏感。
過多的皮脂，乾燥或敏感可能來自壓力，不良飲食或暫時不平衡，如發紅，脫水和皮疹等癥狀。即使是健康的頭皮也會積聚脂肪殘留物，**污染物**，定型產品或死細胞，需要定期去除以使卵泡氧化。
這就是為什麼頭皮護理應該成為健康程式的一部分，提供令人愉悅的清新和輕盈感，即使是最嬌嫩的皮膚也會舒緩。

KEY INGREDIENTS

Fermented Organic Arnica extract is produced through an exclusive hyper-fermentation process. A natural remedy known for centuries for its beneficial medical properties, now used to treat the scalp. The hyper-fermentation process makes this extract a high-performing anti-oxidant and nourishing ingredient.

Zeolite it is a natural mineral with a highly porous texture that effectively binds heavy metals, pollutants and free radicals. By removing them, it helps fight inflammation and regenerate cells.

Kiwi Seeds are the result of an upcycling process, coming from the conversion and reuse of food waste: an ingredient that is worth more than the original material. With their natural texture and perfectly rounded shape, they gently exfoliate the skin and improve blood circulation.

Microencapsulated Vitamin B12 soothes sensitive or stressed skin, protects the skin barrier from inflammation, and plays a key role in accelerating cell recovery and regeneration. With its deep anti-inflammatory effect, it helps reduce rash, redness and itchiness in atopic dermatitis. 100% natural, from bio-fermentation.

Coffee Seed extract is produced by upcycling green coffee seeds from food waste. The micro-grains of the Coffee Seed extract have a gentle scrubbing effect that helps renew the skin surface and leaves it smooth and clean. Rich in plant-based nutrients and natural caffeine, chlorogenic acid, alkaloids, proteins, minerals and vitamins, it boosts circulation in the follicles and in the scalp, improving oxygenation and hydration. It is a powerful anti-oxidant that protects the scalp and hair from daily exposure to pollutants.

主要成分

🧪 發酵有機山金車提取物通過以下方式生產獨特的超發酵過程。

幾個世紀以來以其有益的自然療法而聞名醫療特性，現在用於治療頭皮。

DENSIFYING

DENSIFYING ANTI-LOSS
For sensitive scalps

THE NEED, THE ANSWER

Sometimes, thinning hair can be associated with a sensitive scalp: irritation and pain are combined with a thinner shaft that is less resistant to traction.

This densifying ritual aims to reinforce both hair and scalp. Its vasodilator effect promotes the absorption of minerals and vitamins while soothing and protecting the scalp, leaving the hair thick and strong again.

Key ingredients and the bio-technology of the Morphosis Densifying treatment deliver certified, visible results in the hair texture too.

需求，答案
有時，頭髮稀疏可能與敏感的頭皮有關：刺激和疼痛與較薄的軸相結合，對牽引的抵抗力較差。這種緻密化儀式旨在強化頭髮和頭皮。它的血管擴張作用促進礦物質和維生素的吸收，同時舒緩和保護頭皮，使頭髮再次濃密而強壯。
變形緻密治療的關鍵成分和生物技術也為頭髮質地提供了經過認證的、可見的效果。

TRI-C-PEPTIDES

THE EXCLUSIVE FRAMESI RESEARCH INNOVATION IN ANTI-HAIR LOSS

The micro-encapsulated, biomimetic peptides are biotechnological active elements with a low molecular weight.

The micro-encapsulation technology protects them and increases their biological-availability when applied, effectively transporting them into skin layers, down to the hair bulb, guaranteeing prolonged release over time. There are three peptides, for a full, synergic action on the hair bulb's entire life cycle.

1. Copper Tripeptide - 1

Reinforces and stimulates the follicle, revitalizing and increasing its size reducing hair loss. It also stimulates the production of collagen, elastin and fibroblasts, for a healthy scalp, and has an anti-age, anti-inflammatory function.

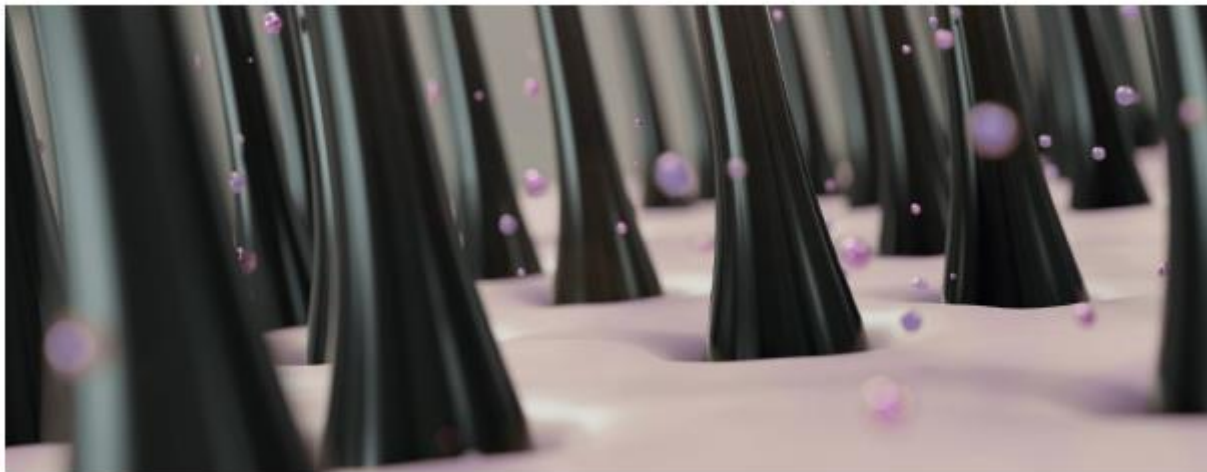

2. Octapeptide - 2

Accelerates hair growth, increases the cell proliferation of keratinocytes and fibroblasts, increasing cell adhesion and the production of collagen and hyaluronic acid.

3. Oligopeptide - 42

Accelerates hair growth, increases blood microcirculation, revitalizing follicles.

Vanillyl Butyl Ether is an anti-hair loss main principle providing a pleasant, prolonged sensation of heat to the skin. Stimulates blood microcirculation directly, inducing the release of neurotransmitters promoting vasodilation. This mechanism improves absorption of all the main principles, calms inflammation and favours synthesis of the hair's main growth factors in the follicle.

三環丙肽 獨家抗脫髮研究創新

微囊化的仿生肽是具有低分子量的生物技術活性元素。微囊化技術保護它們，並在應用時增加其生物利用度，有效地將它們運輸到皮膚層，一直到毛球，保證隨著時間的推移延長釋放。有三種肽，用於對毛球的整個生命周期產生完整的協同作用。

1. 三肽銅 - 1

加強和刺激毛囊，恢復活力並增加其大小，減少脫髮。它還刺激膠原蛋白，彈性蛋白和成纖維細胞的產生，以健康地頭皮，並具有抗衰老，抗炎功能。

2. 八肽 - 2

加速毛髮生長，增加角質形成細胞和成纖維細胞的細胞增殖，增加細胞粘附以及膠原蛋白和透明質酸的產生。

3. 寡肽 - 42

加速毛髮生長，增加血液微迴圈，活化毛囊。香草醇丁基醚是一種抗脫髮的主要原理，為皮膚提供愉悅、持久的熱感。直接刺激血液微循環，誘導神經遞質釋放，促進血管舒張。這種機制改善了所有主要原則的吸收，平息了炎症，有利於毛囊中頭髮主要生長因數的合成。

BALANCE

For greasy scalps

THE NEED, THE ANSWER

When we talk about “greasy hair”, what we really mean is a scalp condition; the scalp produces too much sebum, which can be seen and felt from the roots all the way down to the ends.

So, this rebalancing ritual is aimed at treating the scalp, with astringent, refreshing ingredients that leave the hair soft and clean for longer.

The most effective way to fight excess sebum is a combination of Morphosis Balance and a professional pre-ritual purifying product.

THE NEED, THE ANSWER

Dandruff can come in two forms: dry, with thin, light scales, or greasy, with wide, flat scales that stick to the scalp.

Either way, it is an easily visible and recognizable flaw.

If treated aggressively, dandruff tends to replicate itself.

This purifying ritual acts gradually, making scales disappear and restoring a dry, elastic scalp.

Its antiseptic, decongesting and moisturizing ingredients visibly improve the hair's condition.

RESTRUCTURE

For damaged hair

THE NEED, THE ANSWER

The most effective remedy for hair with structural damage and loss of tone and body, that looks dry, dull and dehydrated, is this shaft-restructuring ritual.

In three steps, it restores collagen and proteins; the hair is instantly plumped and reinforced in its most damaged parts, so it is perfectly regenerated.

For a professional ritual, at least four sessions are recommended: the first two to be had two weeks apart, then once a month.

The home maintenance ritual helps achieve longer-lasting results faster and more effectively.

需求，答案

對於結構損傷，光澤和韌性喪失的頭髮，最有效的補救措施是這種軸重組護理，修復乾燥，暗淡和脫水。

在三個步驟中，它恢復膠原蛋白和蛋白質；頭髮立即豐滿並加固在其最受損的部分，因此可以完美地再生。

對於專業護理，建議至少進行四次治療：前兩次間隔兩周，然後每月一次。

家庭維護護理力有助於更快，更有效地獲得更持久的結果。

KEY INGREDIENTS

Fermented Rice extract is produced through an exclusive hyper-fermentation process. An enzymatic pre-treatment in water enriches the water before the fermentation process. The hyper-fermentation process increases antioxidant power by 20%, protein content by 61%, and amino acid content by 200%. The result is a healthy, strong, hydrated and glossy hair.

Vegan Collagen is plant-derived collagen in different molecular weights from fermented soybeans, rich in active ingredients, such as Peptides, Amino Acids, Lactic Acid, Vitamins and Coenzyme Q10. Actives that are easily absorbed by the skin and scalp and increase cell activity, improve blood flow and prevent cellular aging.

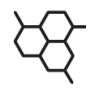

Sulphur-rich plant-derived **Peptides and Amino Acids**, very similar to hair keratin, reconstruct and replenish keratin in damaged hair. Natural hair shafts are deeply hydrophobic, depending on the content of nonpolar amino acids. This exclusive blend of plant-derived peptides improves the hydrophobic profile of the hair, thus more effectively nourishing the inner structure of the shaft than a hydrolyzed blend of keratin, increasing the content of such key elements as sulphur and hydrophobic amino acids, and reconstructing the hair fibers.

PLM-tested restructuring effect

PLM analyses (Polarized Light Microscopy) can look “into” the hair and measure the regenerative effect of the treatment in “polarization colors”. Such colors show the state in which the keratin structures of each part of the hair is organized.

The **MORPHOSIS RESTRUCTURE** treatment has been proven to deliver extremely impactful, deep and complete regenerative results, while the images of the hair after the application of the control treatment looked weak and dull, due to the keratin having completely lost its crystal structure.

KEY INGREDIENTS

Camellia Oil contained in Morphosis Repair is organic. Naturally rich in Oleic Acid, Omega-3 and Vitamins, it is widely used as a beauty product for its moisturizing, softening, nourishing, soothing and anti-oxidant properties.

Vegetable micro-Keratin contains micronized plant-derived proteins, produced through a sustainable enzymatic process, and its composition is quite similar to natural hair keratin. It repairs the hair shaft by reducing hair porosity. With its low molecular weight, it penetrates into the innermost layers of the fibers, for stronger, bouncier hair.

Phyto-Ceramides are plant-derived actives. They have a strong affinity with the scalp and hair, so they effectively protect them and restore the hydrolipid film, for deep moisturization.

主要成分

形態修復中所含的山茶油是有機的。天然富含油酸，歐米茄-3和維生素，它因其保濕而被廣泛用作美容產品，軟化，滋養，鎮靜和抗氧化性能。

COLOR PROTECT

For colored hair

THE NEED, THE ANSWER

Cosmetic dyes are pigments that do not bind to the hair fibers.

That's why repeated washes, weather conditions, such as sun and wind, pollutants and the mechanical action of brushes, hair-dryers and straighteners can cause the color to fade and lose its shine.

The hair then looks dull and porous.

Treating it with a specific ritual is essential to make the colorist's work last longer and keep the hair in perfect condition till the next appointment.

需求，答案
化妝品染料是不與頭髮纖維結合的顏料。
這就是為什麼反覆洗滌，天氣條件，如陽光和風，**污**染物以及刷子，吹風機和直發器的機械作用會導致顏色褪色並失去光澤。然後頭髮看起來暗淡無光。用特定的護理保護它對於使色調持續更長時間並保持頭髮處於完美狀態直到下一次預約，這至關重要。
